JOB DATE

Monday 12 April 2027

THE WORK

Sandstone patio, 24 m², with two raised planters

Laura, good to walk the garden with you on Saturday. Here's the patio and the two planters along the side fence, priced as we discussed.

- Excavation and sub-base: lift the turf, dig out and lay 100 mm of compacted MOT Type 1.
- Paving: 24 m² of riven Indian sandstone on a full mortar bed, 150 mm below the damp-proof course.
- Drainage: a 1:60 fall away from the house and a channel drain at the back door to the gully.
- Jointing and edging: brush-in jointing compound and a sawn sandstone edge to the lawn.
- Planters: two, each 1.8 m × 0.6 m × 0.45 m high, in treated sleepers, lined and filled with topsoil.
- Waste: all excavated soil and turf taken away. About six working days, weather permitting.
